

***All of the follow exit device trims
can be used on common rim exit devices.***

**NO TRIM
(EXIT ONLY)**

No exterior trim. No pull handle, no cylinder, no entering from the outside unless someone on the inside hits the panic bar to open the door.

ENTRY LEVER

Entry function keyed lever trim outside. Key locks and unlocks the lever. With a key you can enter from the outside when the lever is locked. With the key you can unlock the lever to allow anyone to enter. Supplied with two keys x C-keyway.

**STOREROOM
LEVER**

Storeroom function keyed lever trim outside. Key unlocks lever and once the door closes/latches it remains locked (positive locking) until someone with a key opens the door or someone inside hits the panic bar to open the door. With a key you can enter from the outside when the lever is locked. Storeroom function will always lock when the door closes or is latched. Supplied with two keys x C-keyway.

**ENTRY LEVER
X SFIC**

Entry function keyed lever trim outside. Key locks and unlocks the lever. With a key you can enter from the outside when the lever is locked. With the key you can unlock the lever to allow anyone to enter. The IC lever is provisioned to receive an SFIC (Small Format Interchangeable Core) which is supplied by others.

**STOREROOM
LEVER X SFIC**

Storeroom function keyed lever trim outside. Key unlocks lever and once the door closes/latches it remains locked (positive locking) until someone with a key opens the door or someone inside hits the panic bar to open the door. With a key you can enter from the outside when the lever is locked. Storeroom function will always lock when the door closes or is latched. The IC lever is provisioned to receive an SFIC (Small Format Interchangeable Core) which is supplied by others.

**PASSAGE
LEVER**

Passage function lever trim outside. Lever always unlocks for anyone to enter from outside.

**CYLINDER &
PULL HANDLE**
